A FOOT LOCKER UX STUDY

Foot Locker

Does user experience improve growth?

A closer look at the path to purchase

Foot Locker

A shorter path to the next pair

ILLUSTRATIVE JOURNEY, NOT VERIFIED CLICKS

ALMOST

9

steps in the original concept

3

stages in the proposed flow

The proposed journey

01

Find your pair

Browse a shoppable homepage.

02

Choose your size

Select a size without leaving the page.

03

Review your bag

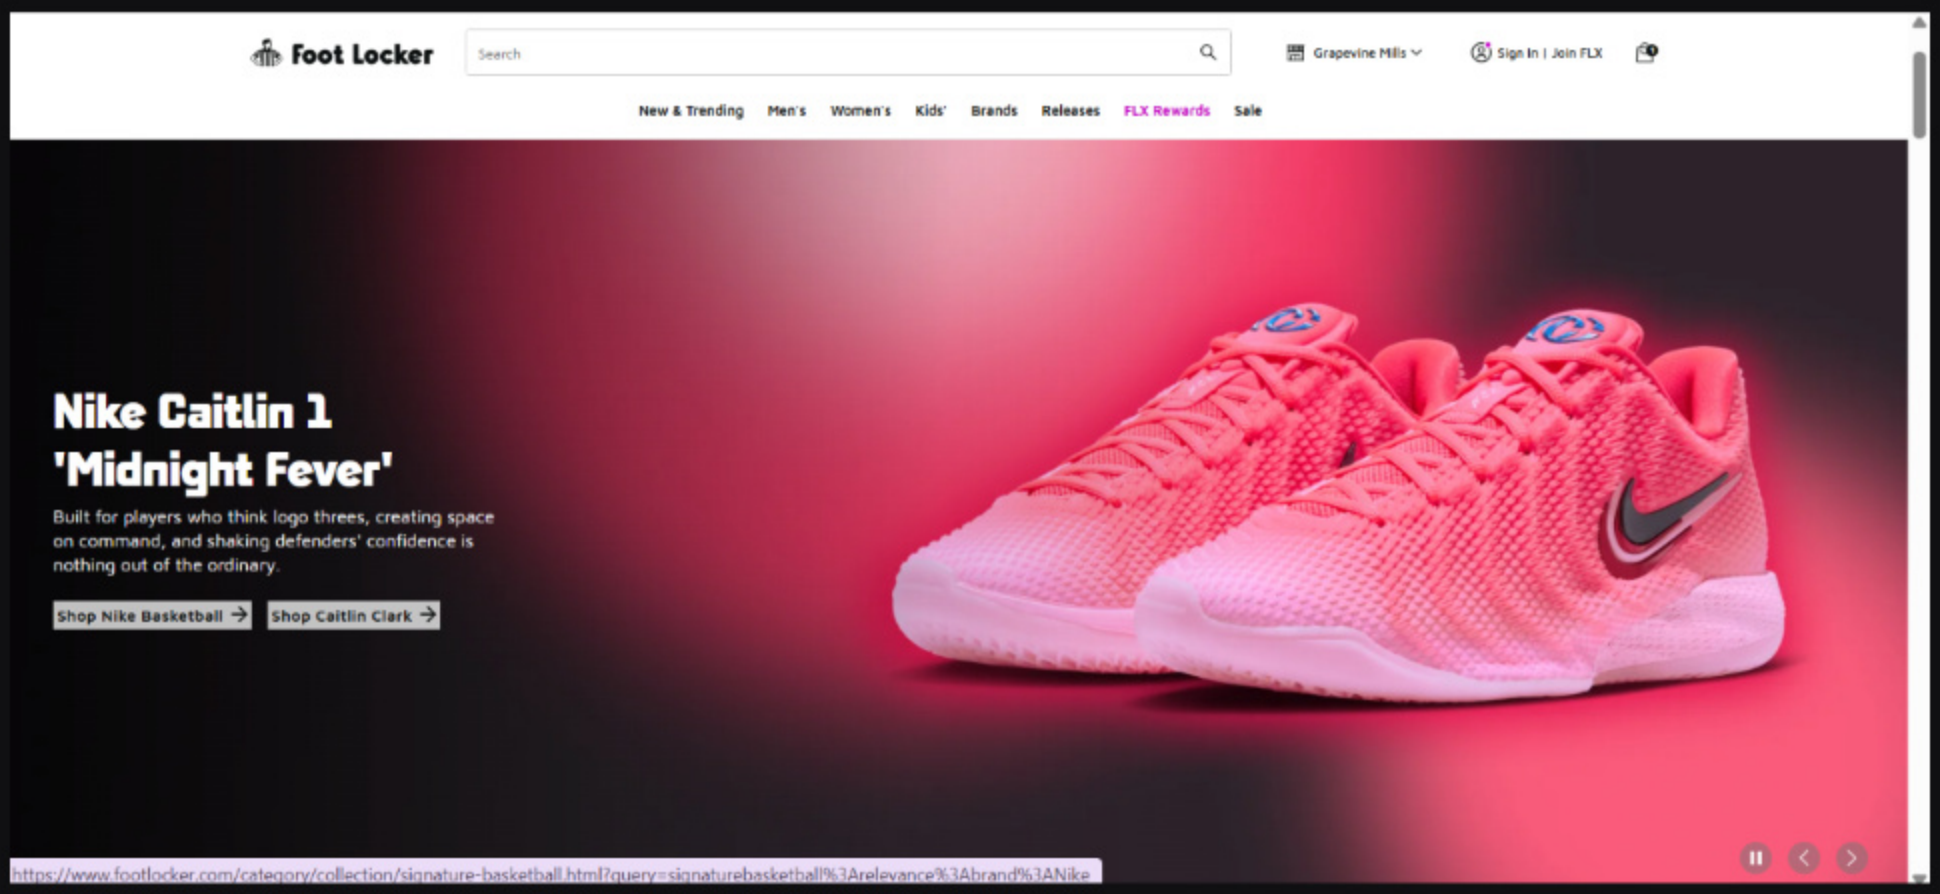

Continue toward checkout.

The prototype stops before payment.
Validate total clicks using the same start and end points.

Foot Locker

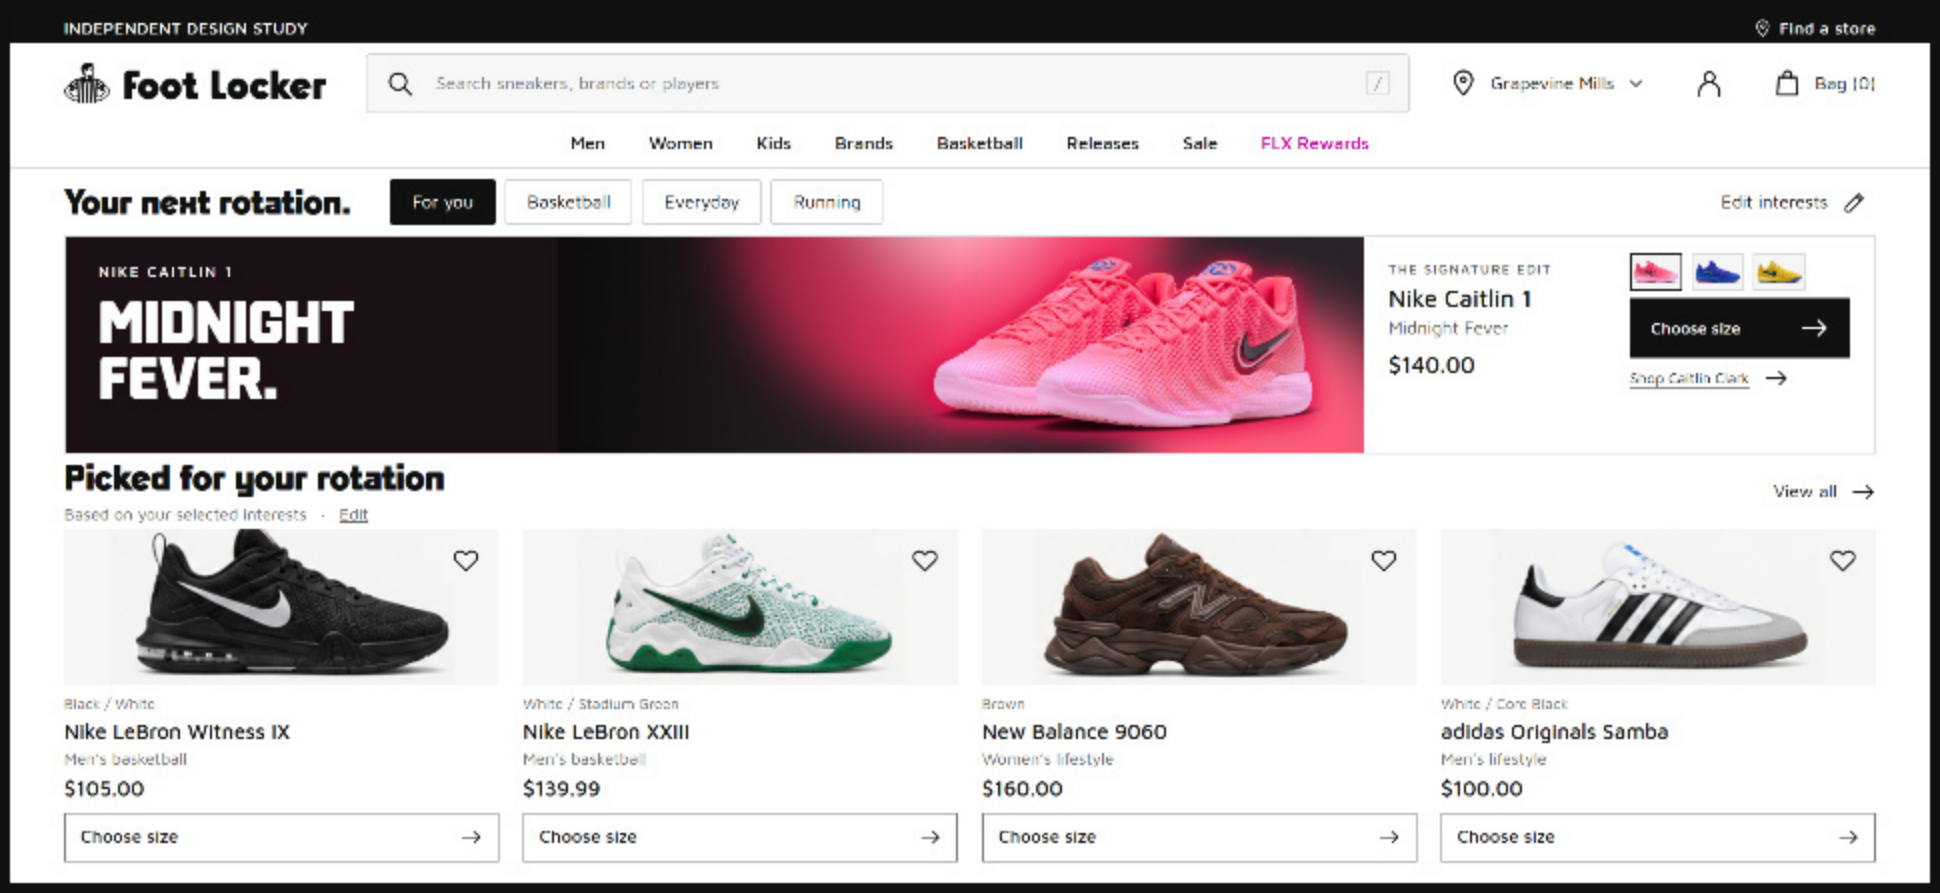

The homepage, ready to shop

ORIGINAL

The campaign fills most of the first screen.

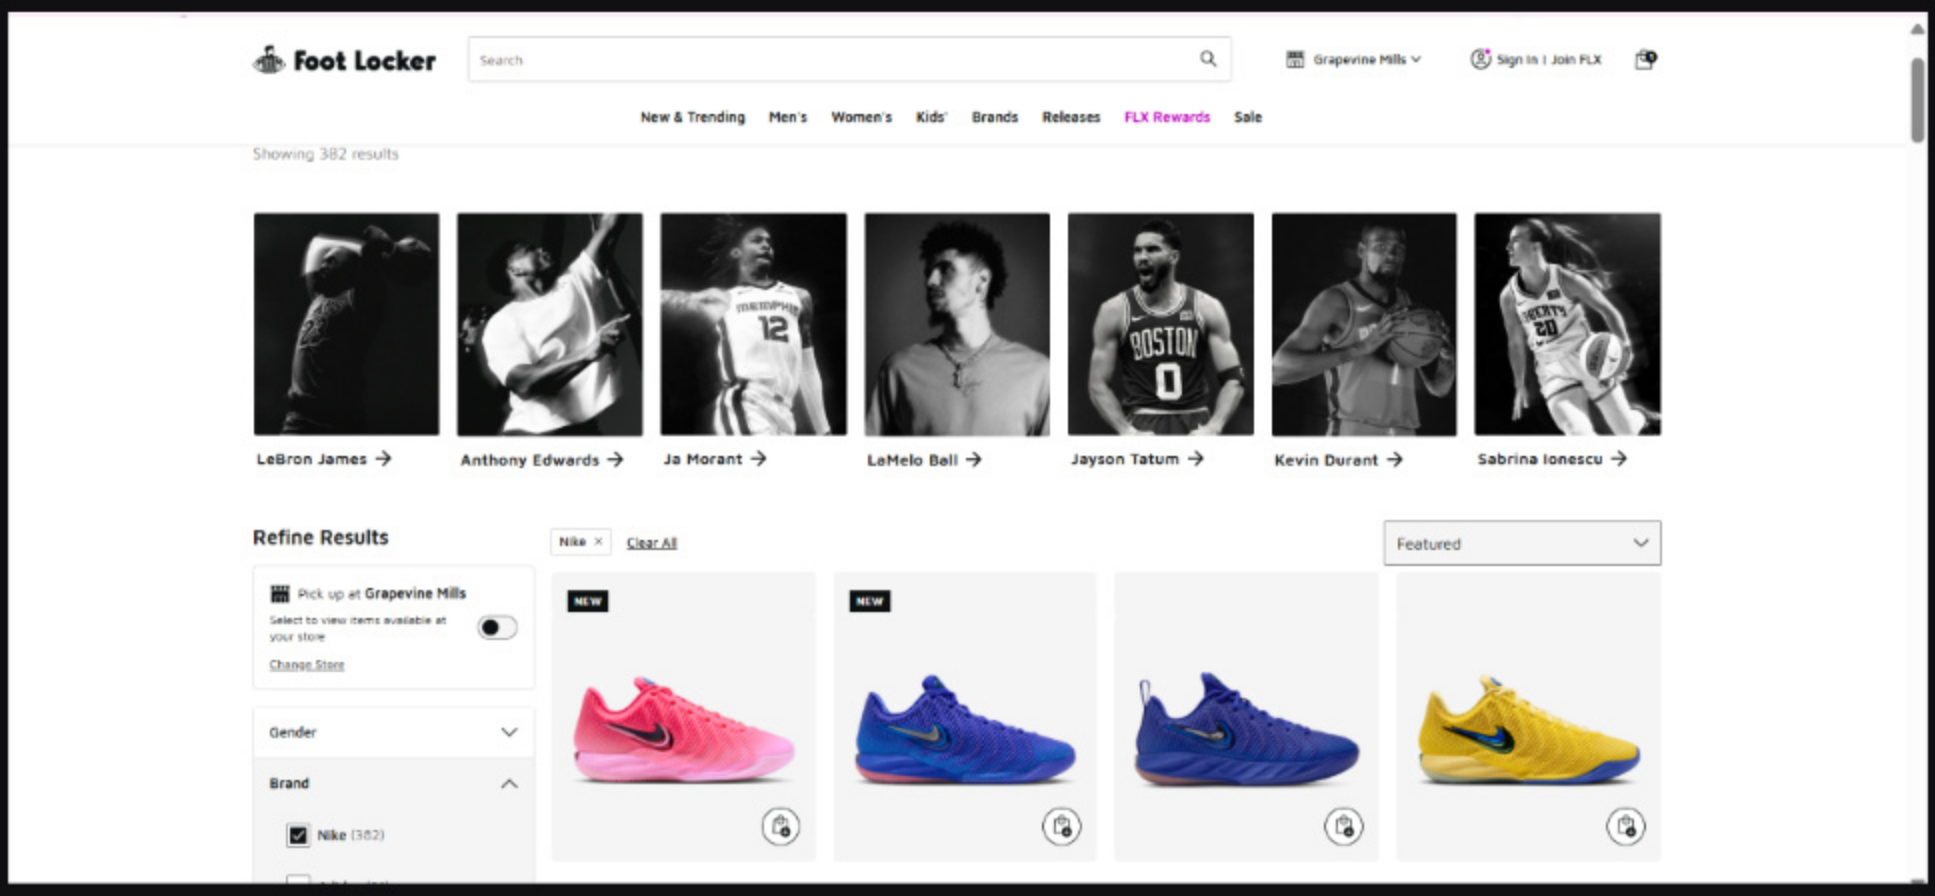

REDESIGN

Foot Locker

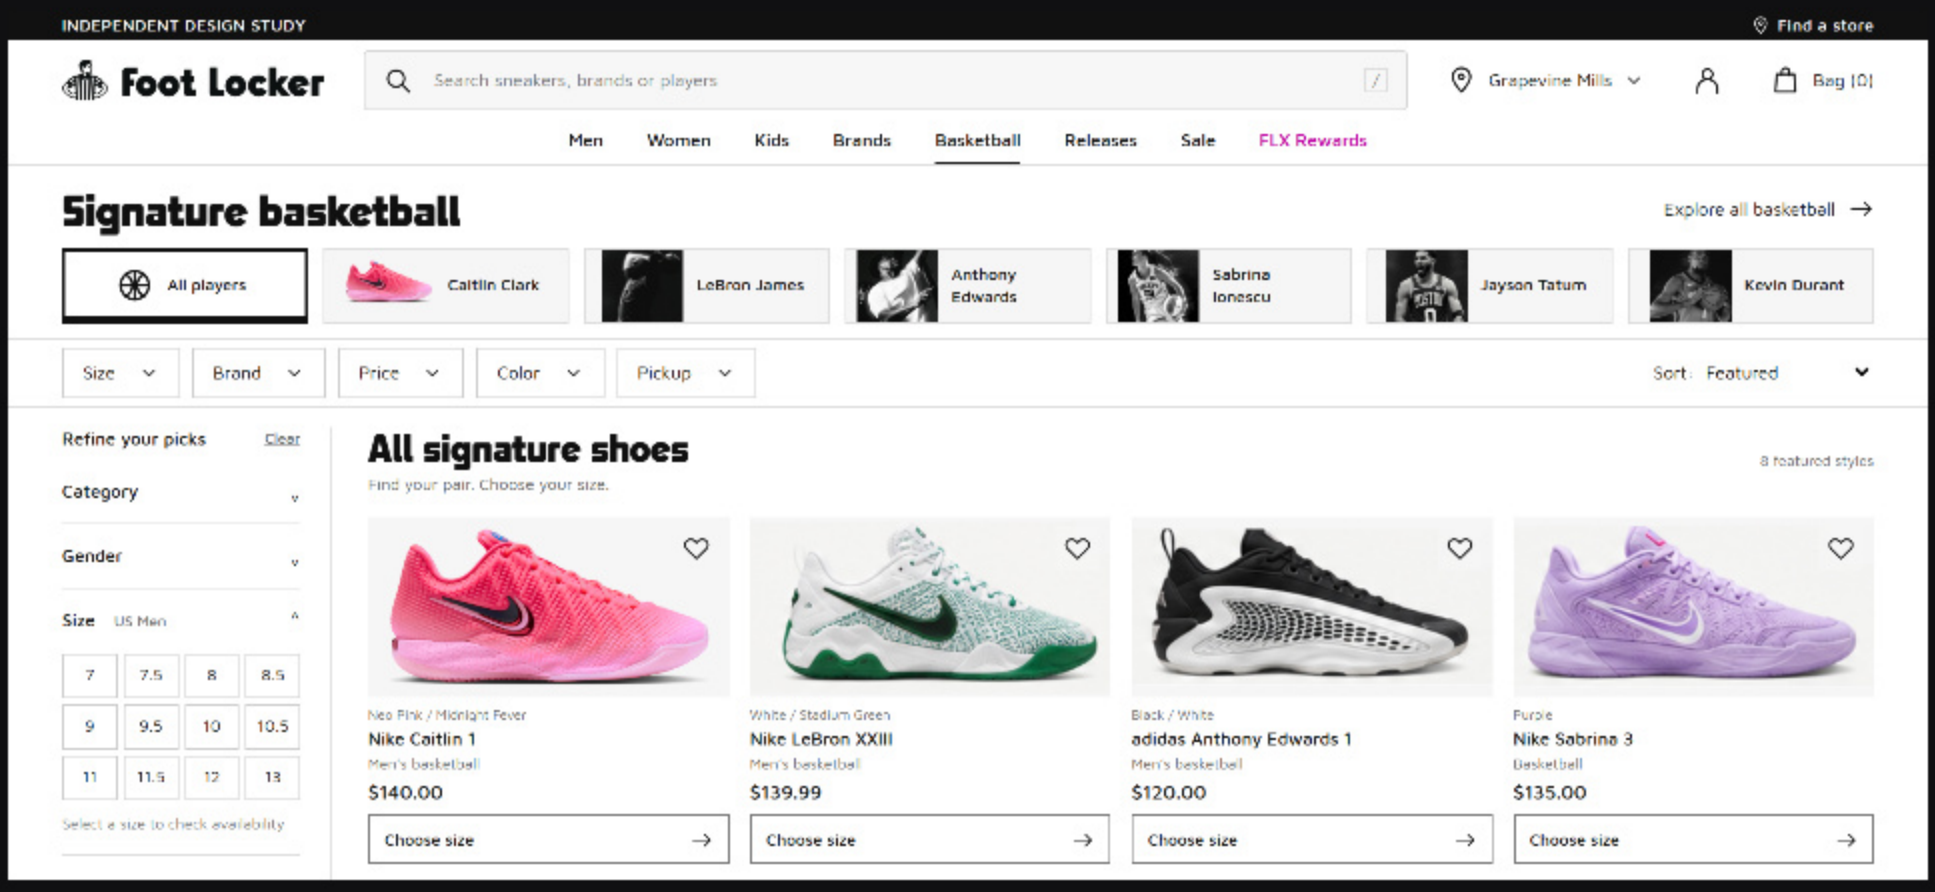

The assortment stays in view

ORIGINAL

Large athlete portraits sit above the products.

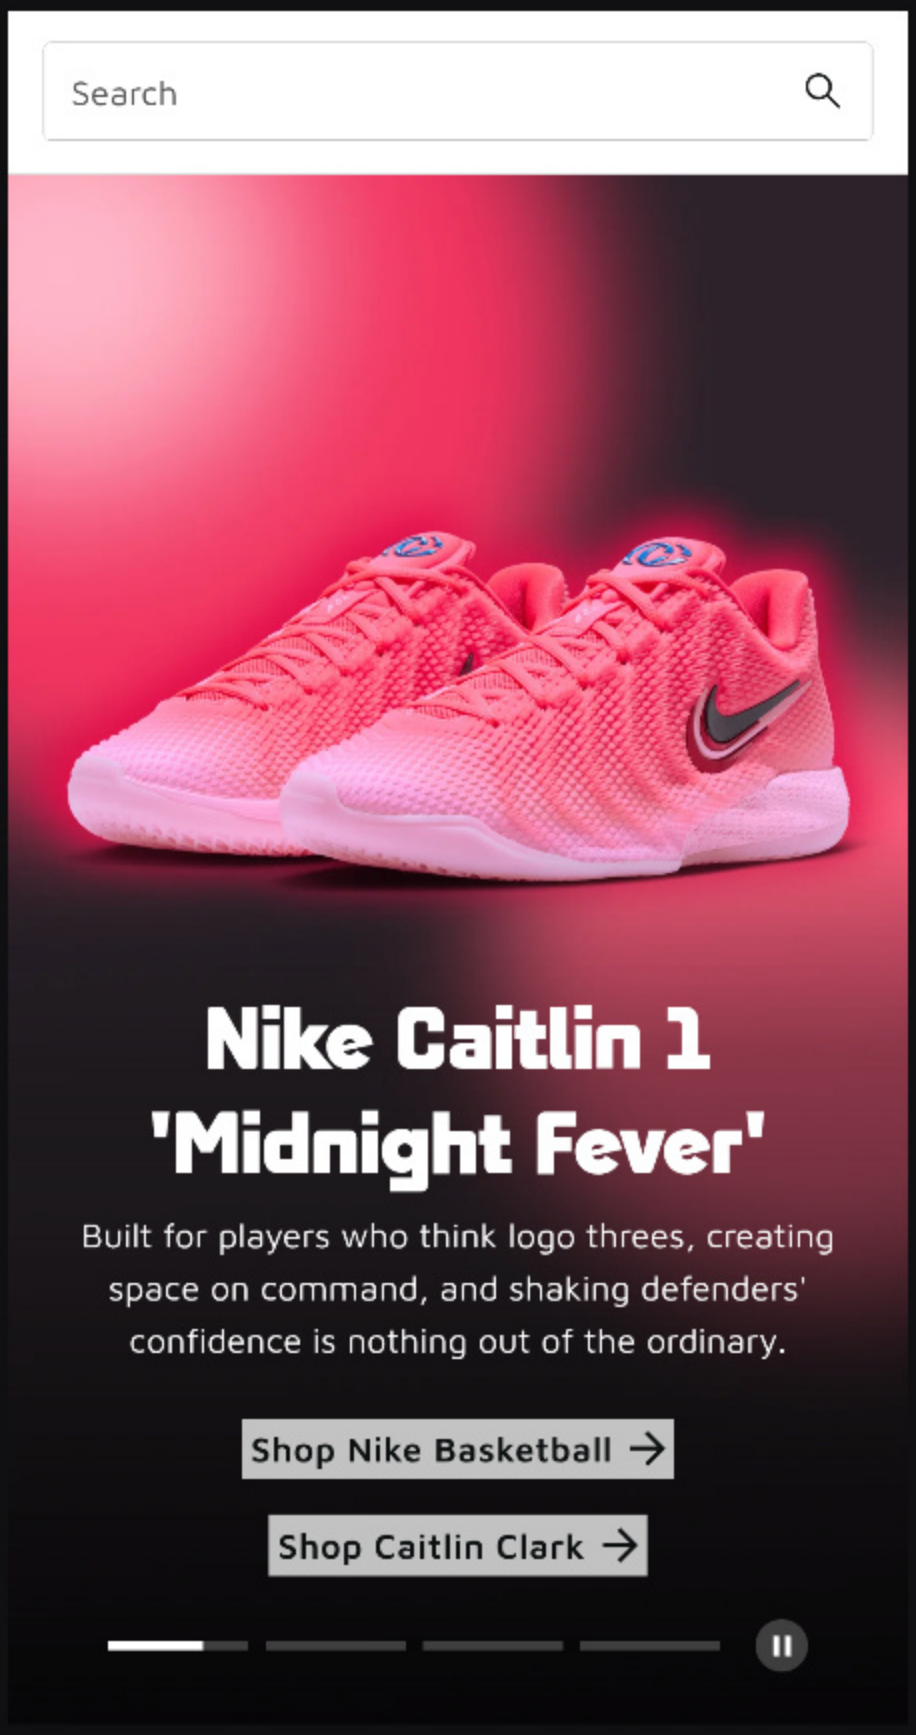

REDESIGN

Foot Locker

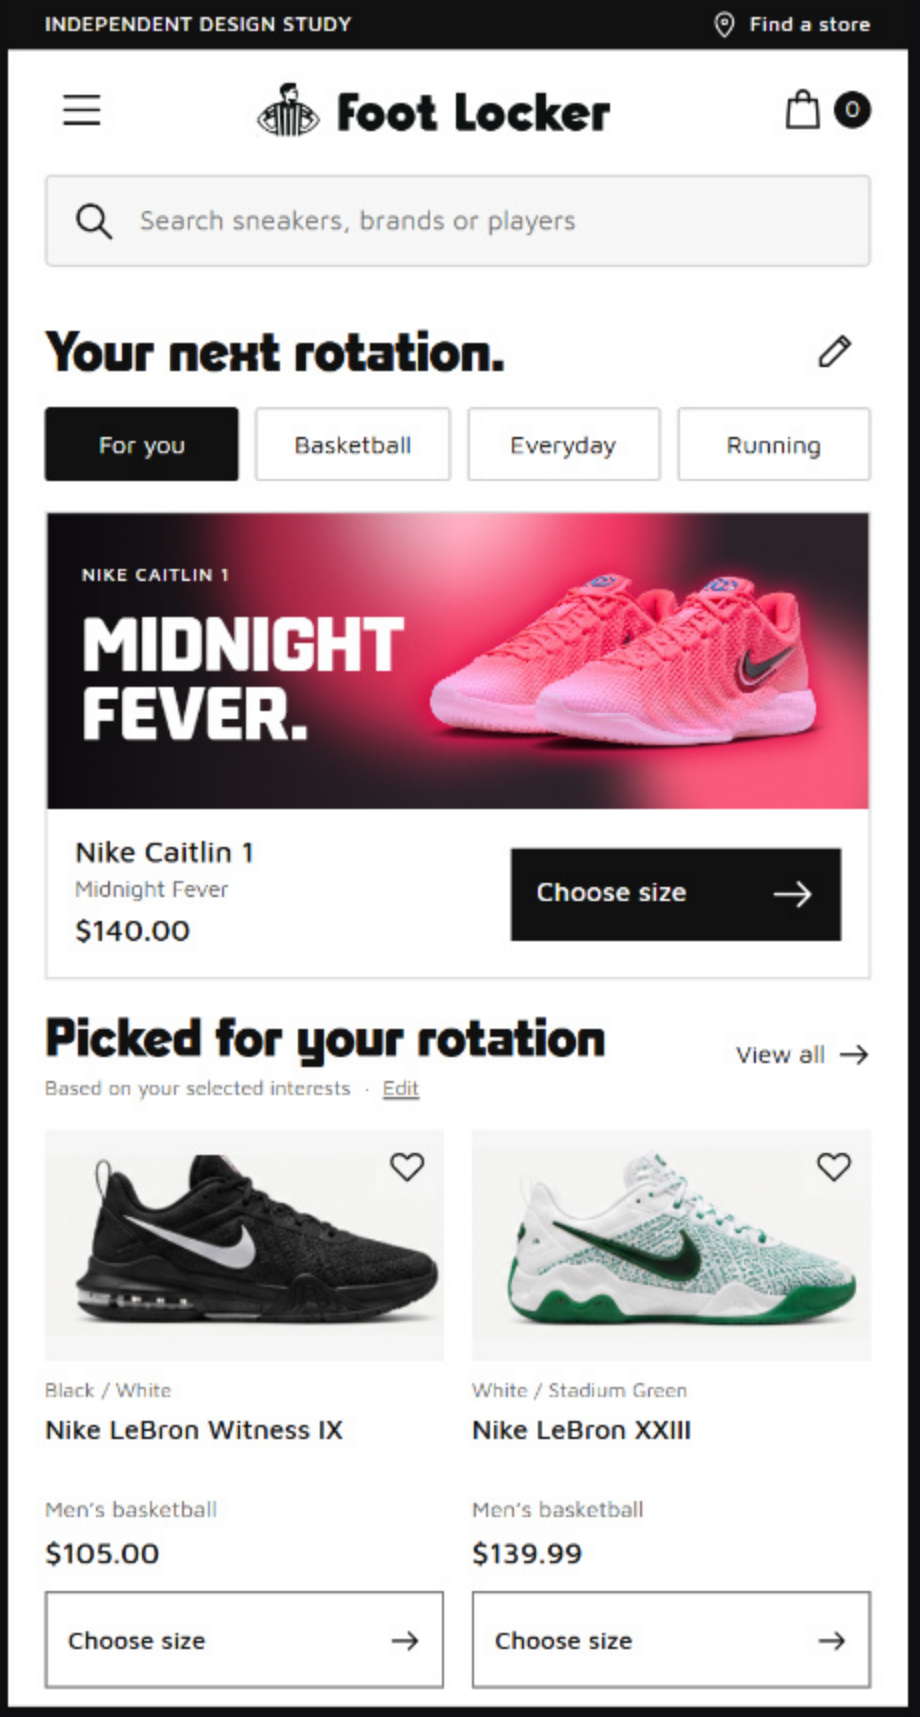

The mobile comparison

CURRENT SITE

The campaign leads to a collection.

REDESIGN

Price, size action and recommendations in view.

Cropped captures; viewport and scroll positions differ.

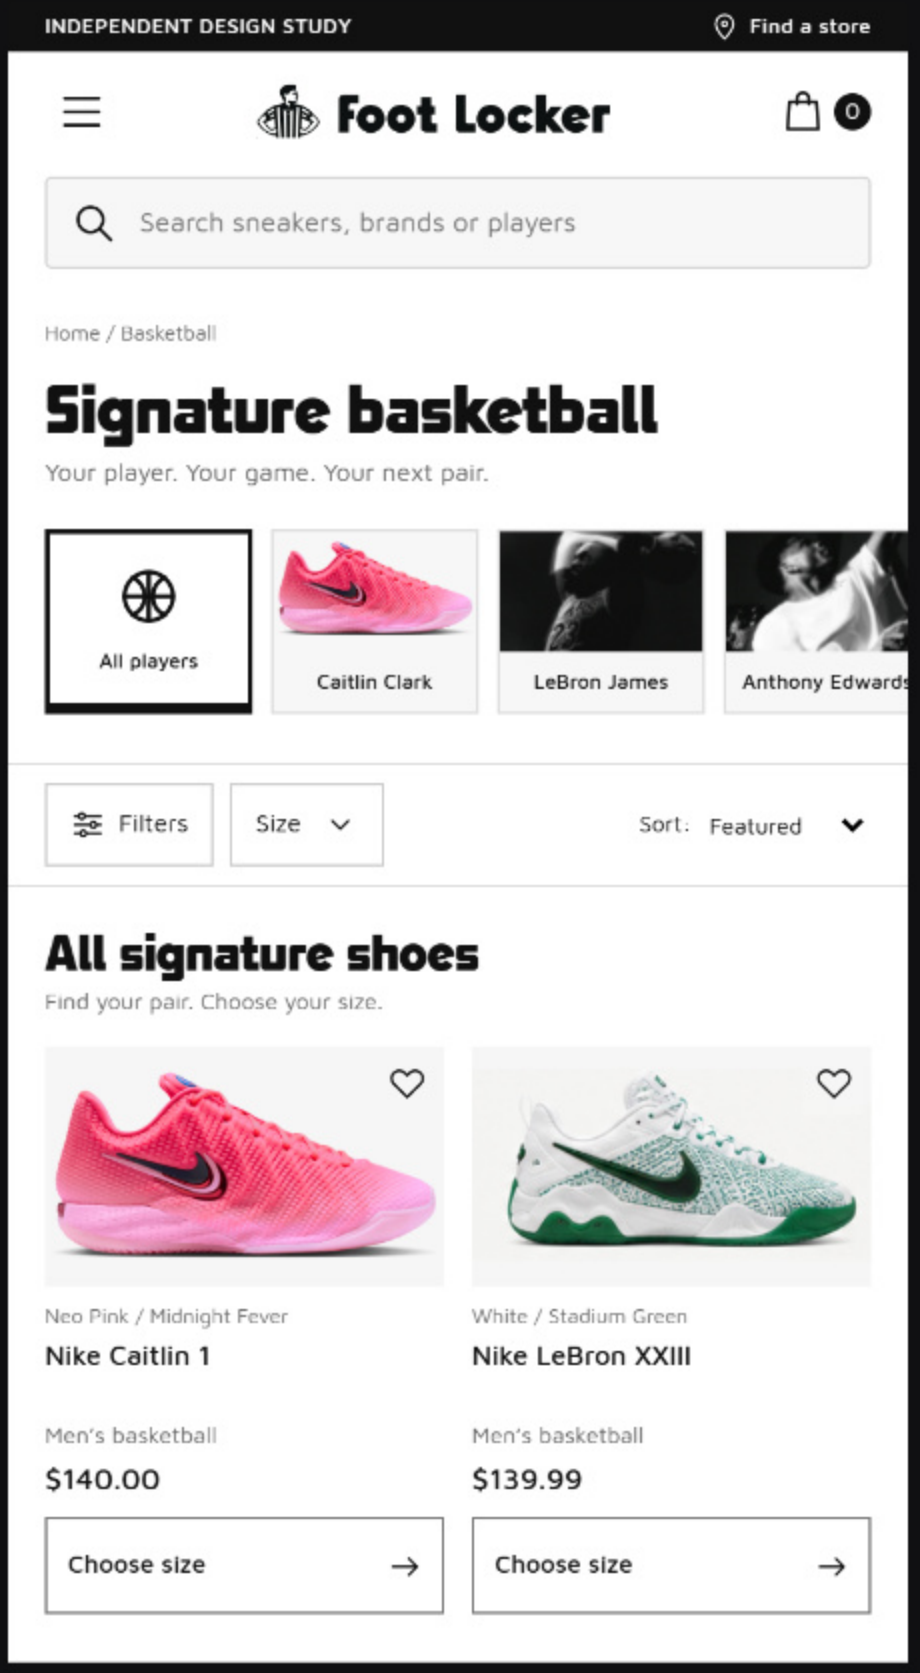

Foot Locker

Athlete discovery, with products in view

CURRENT SITE

REDESIGN

Large athlete portraits lead the collection.

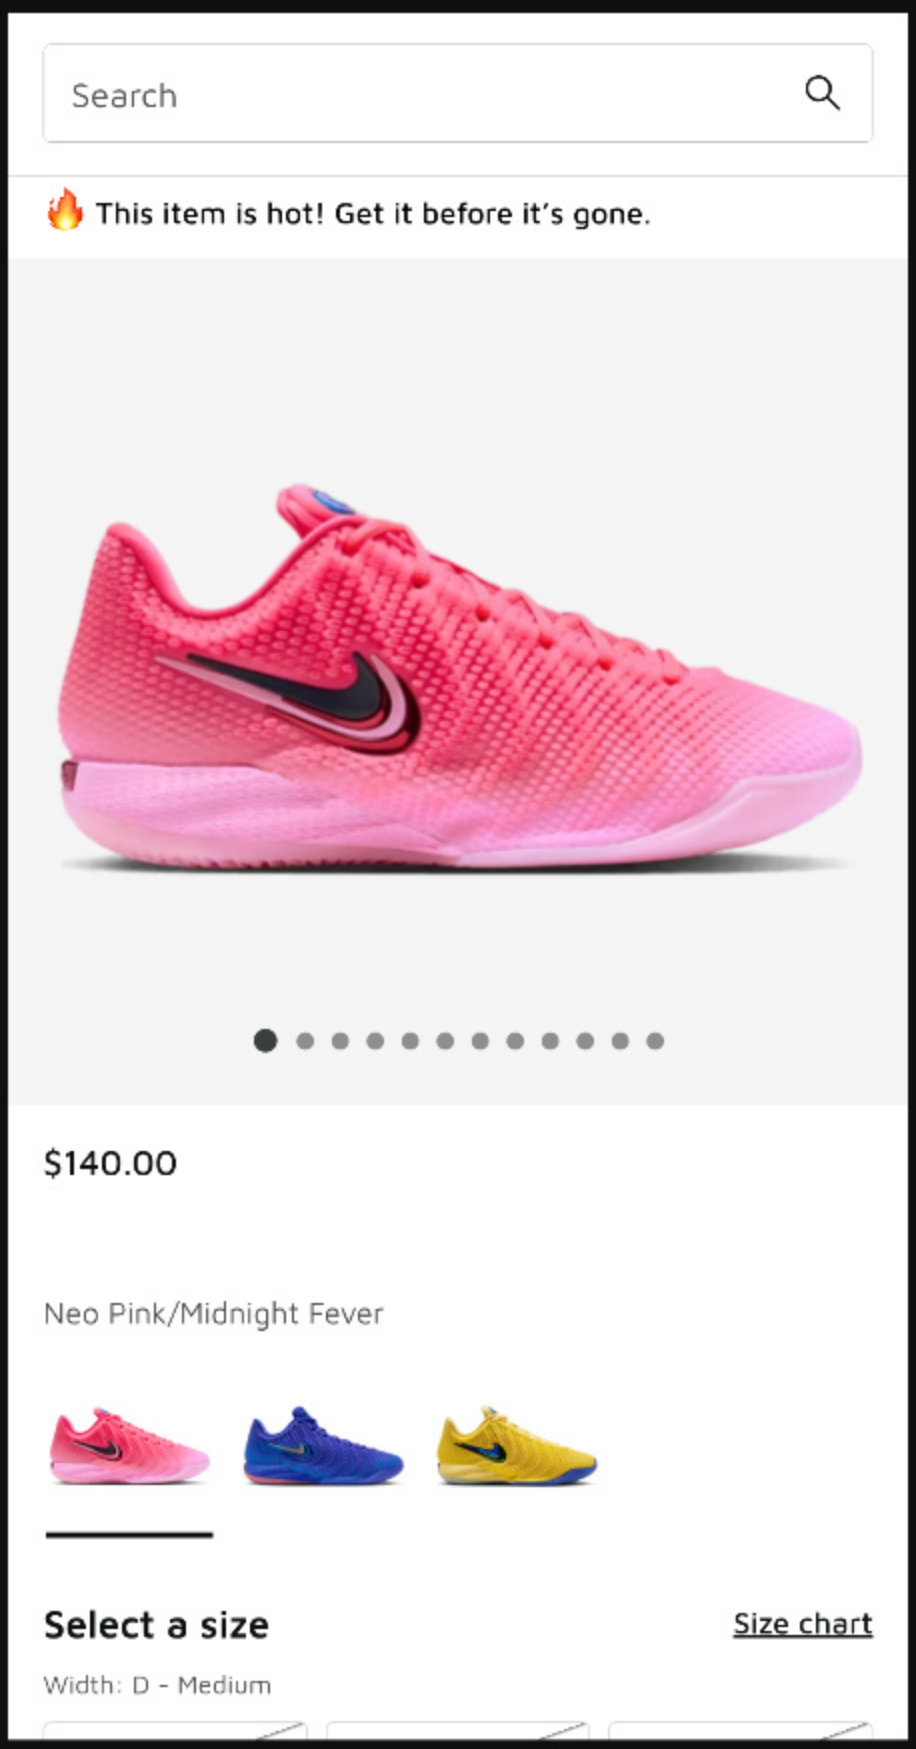

Compact athlete filters sit above the products.

Cropped captures; viewport and scroll positions differ.

Foot Locker

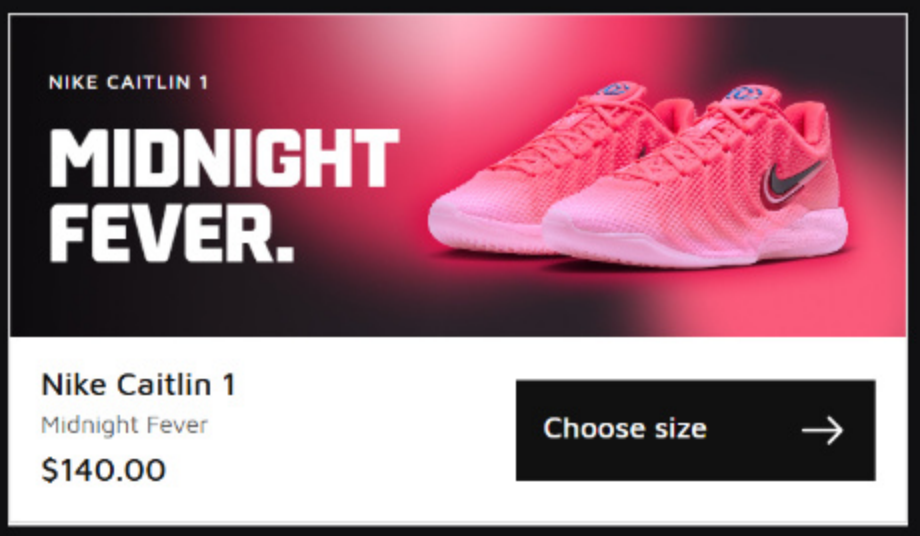

Product details stay close

CURRENT SITE

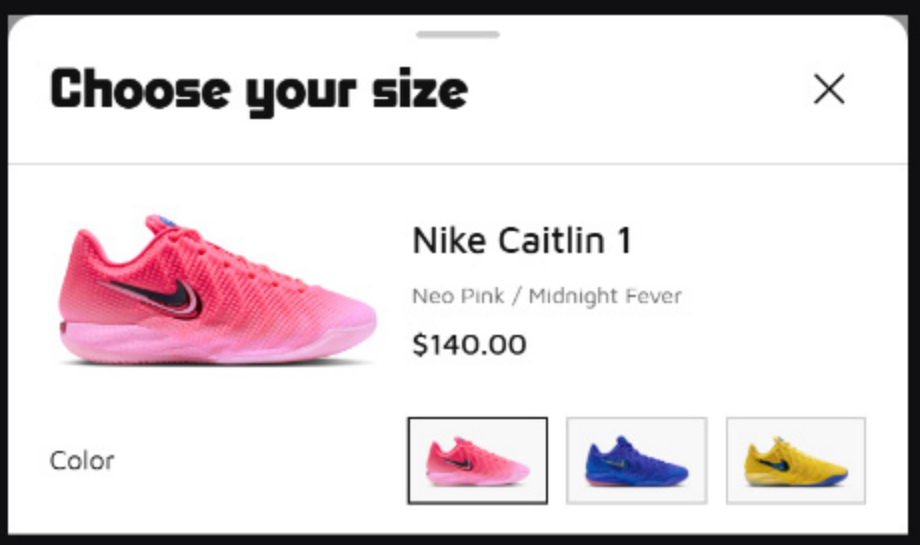

A large product image precedes the size controls.

REDESIGN

ON THE HOMEPAGE

Price and the size action sit below the campaign.

INSIDE QUICK SHOP

Product and color stay visible while choosing.

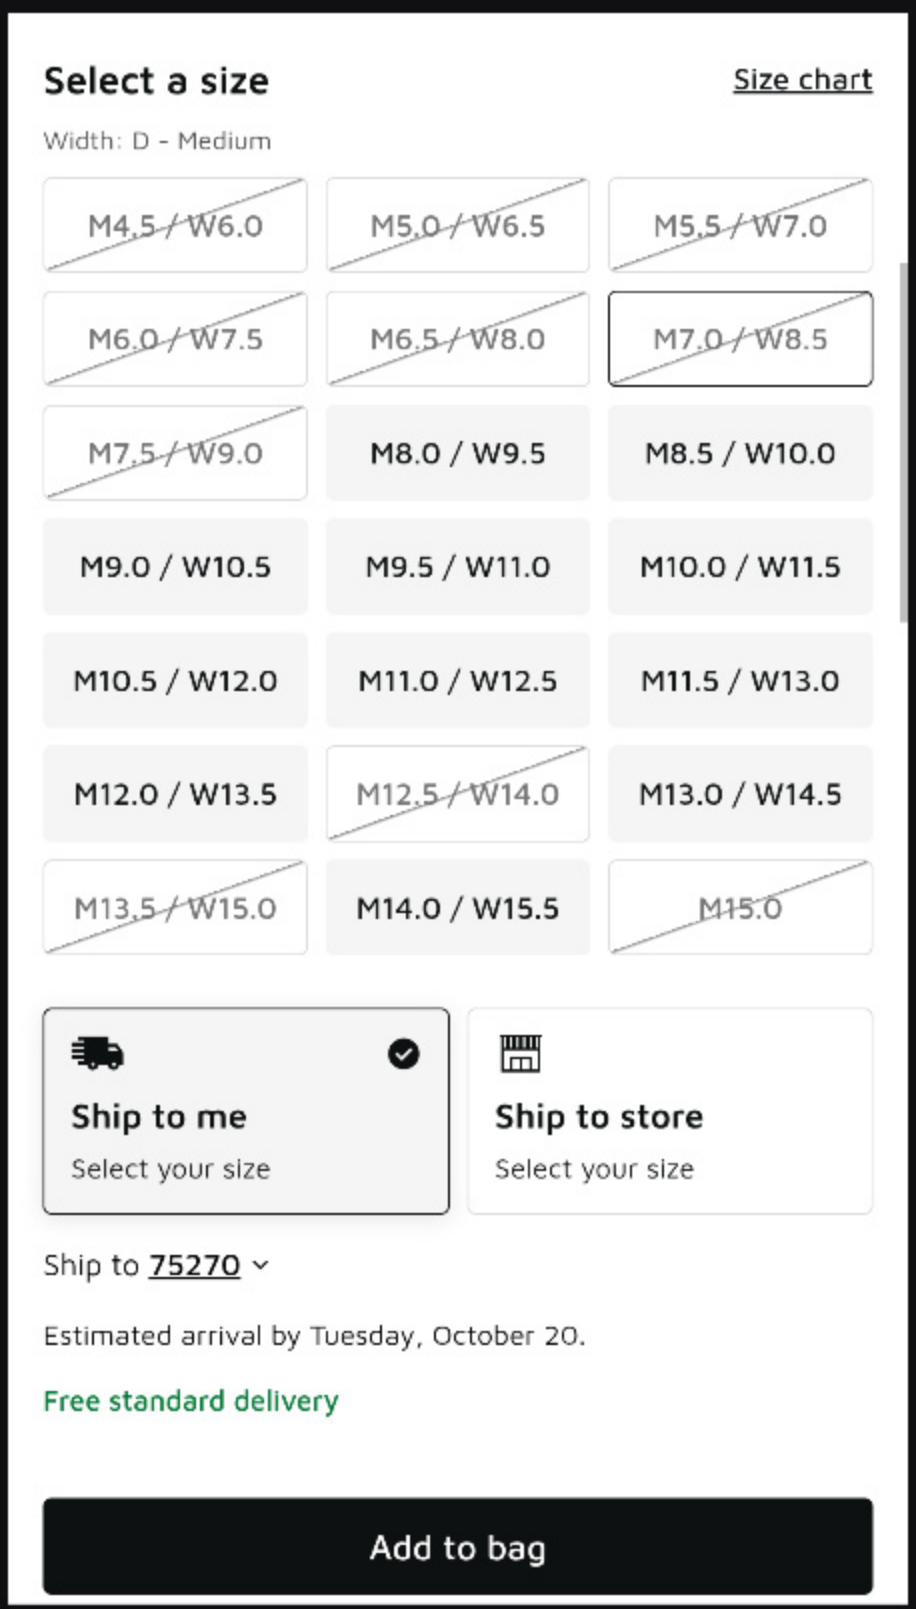

Right: detail crops from two separate redesign states.

Foot Locker

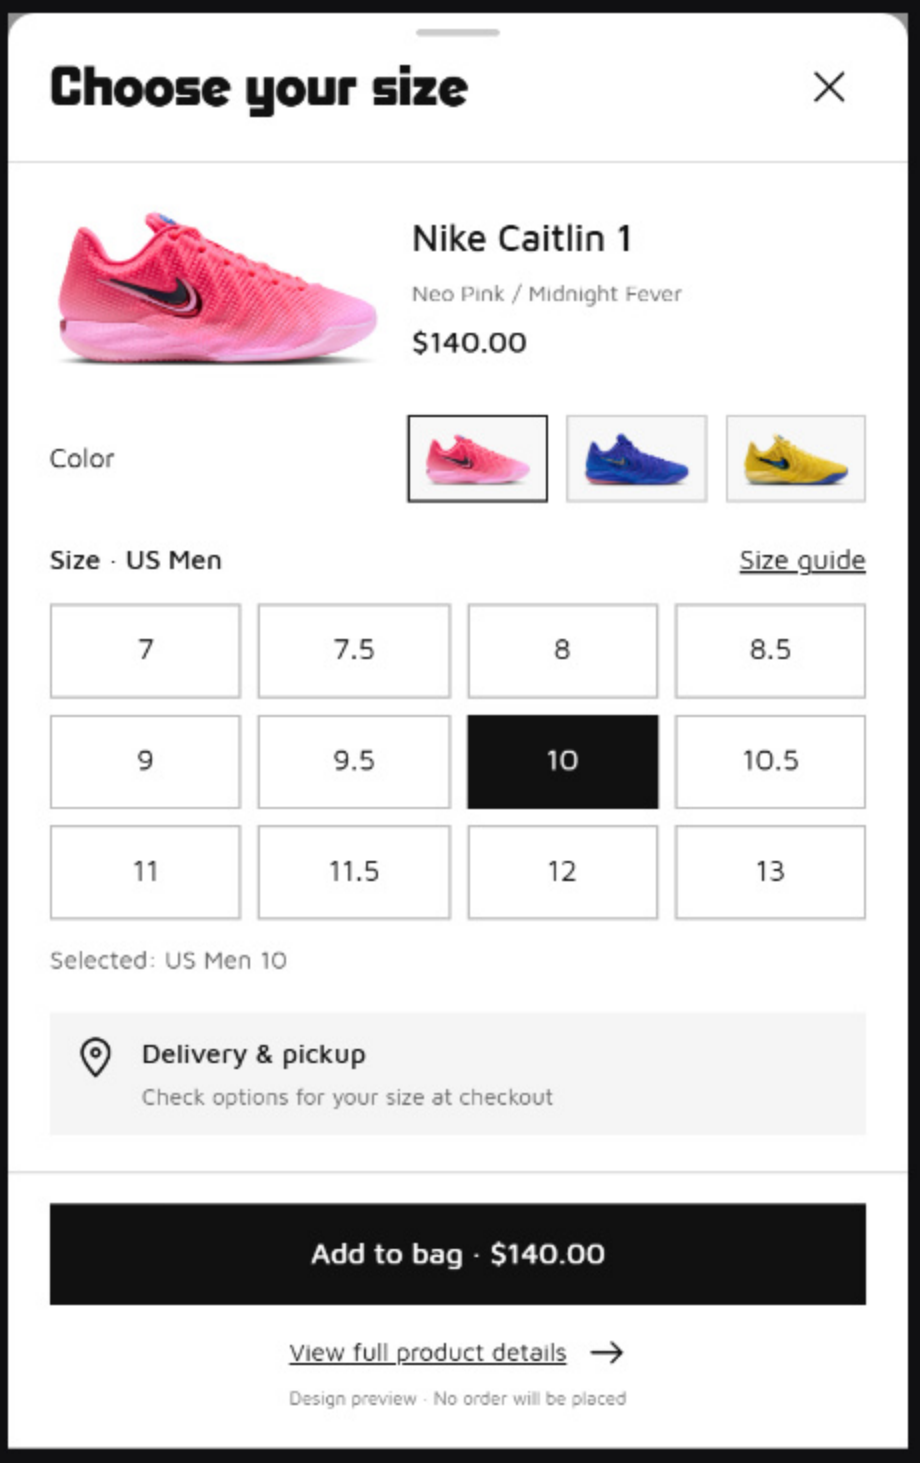

The choice stays with the product

A product page compared with an in-page size sheet.

CURRENT SITE

REDESIGN

Size and delivery on the product page.

Product, size and action in one sheet.

Prototype layout; size availability is not live inventory.

Foot Locker

Better UX. Growth to prove.

A clearer route may help more shoppers reach a confident purchase.

Measure task completion, purchase conversion and revenue per session in a controlled test.

Where would you remove the next detour?

Design hypothesis. Commercial impact remains unmeasured.
